Examiner's Amendments to the Specification

In page 1, underneath the title insert the following:

--- This application is a Divisional of U.S. Application No. 09/518,386 filed 3/3/2000, now U.S. Patent No. 6,365,386 issued 4/2/2002, which claims priority to EPO 99104668.1, filed 3/9/1999 and EPO 00101666.6, filed 2/1/2000. ---.

The following is an **Examiner's Statement of Reasons for Allowance**:

Claims 35-38, 40-50 and 52 are directed to a method of producing astaxanthin comprising culturing a host cell comprising isolated polynucleotides encoding an astaxanthin synthetase of specific amino acid sequence and specifically claimed homologs thereof, wherein the synthetase and homologs thereof are present either in a reconstituted biological membranes or synthetic membranes.

Claimed polynucleotides and homologs thereof are free of prior art. Further, the prior art does not teach or suggest preparing such specifically claimed polynucleotides. Hence said polynucleotides are also non-obvious. Since said polynucleotides and homologs thereof are both novel and non-obvious, host cells comprising said products and method of astaxanthin production utilizing said host cells are also novel and non-obvious.

Claims 35-38, 40-50 and 52 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
